Homerun Battle 3D now supports Lollipop update! For questions or customer support, please contact our customer support by visiting App Schermi Permissions requires the following permissions on your Android device.view network connections allows the app to view information about network connections, such as existing networks and are connected. Wi-Fi allows the app to view information on the Wi-Fi network, for example if Wi-Fi is enabled and the name of connected Wi-Fi devices. change network connectivity allows the app to change the status of network connectivity. allow Wi-Fi multicast reception allows the app to receive packages sent to all devices on a Wi-Fi network using multicast addresses, not only the phone. uses more power than non-multicast mode. Retrieving running applications allows the app to recover information about the current and recently running tasks. this can allow the app to discover the information on which applications are used on the device. Network access allows the app to create network sockets and use custom network protocols. browser and other applications provide means to send data to the internet, so this permission is not necessary to send data to the internet. read the status of the phone only allows you to read access to the status of the phone, including the phone number of the device, current mobile network information, the status of any current call, and a list of any registered phone account on the device. edit or delete the content of the sd card allows the app to write to the sd card. In-App Invoicing In-app billing on google play provides a simple and easy interface for sending In-app billing requests and managing In-app billing transactions using google play. Play.
